Total cost of Building furnished complete, together with sidewalks and planting of grounds	156,174.05

In connection with the above statement attention is directed to the fact that while the total expenditure exceeds the Bond issue, there are many items included in the total cost mentioned above that should be considered as being extras not directly within the intention of the Bond issue.

Such extras include the side walks, planting of grounds, gas engine for emergency use when electric power is off, cistern to provide soft water for boiler, decorating of walls, finishing of Storage Room in Basement, Bronze signs, floor in attic space, water pipe on grounds for sprinkling lawn, and many other items which were not originally contemplated but which, as the Board could see, would be done within a short time anyway and might better be done at once as a considerable ^{eventual} saving could be affected in that manner.

The extra items will more than total the amount expended above the 150,000. Bond issue.

I wish to call attention also to the fact that, making a very

conservative estimate, the same building if built at the present time would cost at least \$200,000.

Petition for the establishment of Drainage Ditch.

State of South Dakota, } ss:
 County of Charles Mix }

To the County Commissioners of Charles Mix County, S. Dak.:

The undersigned owners of land liable to be affected by the following proposed drainage ditch in Charles Mix County, South Dakota, hereby represent that for the purpose of draining agriculture land it is necessary and expedient that a drainage ditch be established and constructed over the following course, to wit: commencing at the southwest corner of the southeast quarter of 33-98-65 in Charles Mix County, South Dakota, thence in a north westerly course about 80 rods, thence in a southeasterly course thru sections 33 and 34-98-65 into a large lake in section 3-97-65, and extending thru said lake across said section to about the southeast corner of the NE 1/4 of 3-97-65, then about due east nearly half a mile, all of said foregoing course being a natural water drain, to another lake bed thence nearly north about half a mile then following a course east to Skunk Creek a natural drainage which empties into the Lake of Andes in said County. That the outlet of said drainage into Skunk Creek would be in section 2-97-65, in Lot 1 of said section on or near the section line where said Skunk Creek intersects said section line. That said drainage ditch could be connected with lateral ditches and a large amount of valuable agriculture lands would be benefitted, whereas they are now rendered valueless as farming land on account of waters collecting and remaining there on. Wherefore your petitioners pray that your honorable body establish and construct a drainage ditch in accordance with the
